

(Senior) Project Manager - Autonomous Driving

Zurich – Munich

Embotech is an award-winning software scale-up developing cutting edge technology and solutions for autonomous vehicles and robotics, with focus on private ground applications such as logistics yards, Autonomous Valet Parking (AVP) and mining. We are accelerating the transition towards safe autonomous transportation by leveraging the real-time optimization technology that we have been developing since 2012.

We are looking for an experienced project manager to lead several of our external (customer) projects, developing and deploying autonomous driving systems at the customer sites. Additionally, this role will be responsible for portfolio management of around 25 internal and external projects, including resource management. In the medium term, this role should also help to streamline project management processes in the company as a first step towards building a Project Management Office (PMO).

Responsibilities

- Lead customer delivery projects of automated driving systems for customers around the globe
- Act as key single point of contact towards key accounts, customers and partners relevant to the projects
- Reporting of project progress to internal and external stakeholders
- Manage portfolio of around 25 external projects, including resource management and prioritisation
- Lead resource management meeting, including all relevant stakeholders in order to highlight bottlenecks and facilitate decision making and prioritisation
- Streamline project management processes

Requirements

- Master's degree in engineering (electrical, mechanical), computer science or similar
- At least 10 years of experience leading project teams and large development projects, of which at least 5 leading large software projects
- Experience in running a portfolio of projects including planning, resource management and prioritisation
- Background in computer science
- Project management certification (PMI PMP or equivalent)
- Evidence of successful customer deliveries of software-defined products
- Excellent communication skills - Comfortable doing presentations
- Fluent in spoken and written English & excellent communication skills in German

This position will be reporting directly to the CEO of the company.
