

DEVOPS ENGINEER (ZURICH OR MUNICH)

Embotech is a software company developing cutting edge autonomous driving technology for autonomous vehicles, with focus on private ground applications such as logistics, Autonomous Valet Parking (AVP) and mining. We are determined to accelerate the transition towards safe autonomous transportation by leveraging the core real-time optimization technology that we have been developing since 2012.

Our team is comprised of highly skilled employees with a passion for excellence and efficiency. We are looking for highly motivated people to help us solve one of the most complex challenges of tomorrow and take our company to the next level.

We are looking for a DevOps engineer to join our interdisciplinary team and help to build, extend and maintain a cutting-edge IT infrastructure for software development and deployment within the automotive, industry and aerospace industries.

You will get the opportunity to understand and influence the tools used in a modern and dynamic software development environment, providing essential assistance to a team that works at the leading edge of today's motion planning technology and autonomous logistics.

Responsibilities

- Ensure the confidentiality, integrity and availability of our IT services
- Maintain infrastructures and application platforms for development and integration environments
- Document your work
- Coordinate efforts with other employees

Basic Requirements

- Hands-on experience using and administering servers and tools, including:
 - Git / GitHub
 - Python
 - Docker / Linux containers
 - Jenkins
 - CMake
 - Linux servers
 - Windows servers and simple MSSQL Administration
 - Software for requirements management
 - Cloud services such as Azure and AWS
- Experience working in a CI environment
- Experience developing software is a plus
- Experience with Information Security Management is a plus
- Experience with ISO27001 or TISAX is a plus
