

# DevOps Engineer

## Zurich or Munich

Embotech is a software company developing cutting edge autonomous driving technology for autonomous vehicles, with focus on private ground applications such as logistics, Autonomous Valet Parking (AVP) and mining. We are determined to accelerate the transition towards safe autonomous transportation by leveraging the core real-time optimization technology that we have been developing since 2012.

We are looking for a DevOps engineer to join our interdisciplinary team and help to extend and maintain a cutting-edge IT infrastructure for software development and deployment.

You will get the opportunity to understand and influence the tools used in a modern and dynamic software development environment, providing essential assistance to a team that works at the leading edge of today's motion planning technology and autonomous logistics.

### Responsibilities

- Extend and maintain infrastructures and application platforms for development and integration environments
- Configure CI pipelines, including the corresponding infrastructure (Jenkins, GitHub Actions, Docker, VMs, physical servers, etc.)
- Ensure the confidentiality, integrity and availability of our IT services
- Ensure high development standards by establishing best practices according to the latest developments in the field

### Requirements

- Hands-on experience using and administering servers and tools, including:
  - Git / GitHub, Python, Bash, Jenkins, GitHub Action
  - Docker, Linux servers
  - Windows servers and simple MSSQL Administration
  - Software for requirements management
  - Cloud services such as Azure and AWS
- Experience working in a CI environment
- Experience developing software in C/C++/Rust/Python is a plus
- Experience with Information Security Management is a plus
- Experience with ISO27001 or TISAX is a plus
- Good communication skills in English

We offer an exciting job in a fast-growing company with attractive conditions and flexible hours. Embotech develops innovative products in a modern and dynamic environment, and you can expect an international atmosphere, with highly skilled colleagues with a passion for excellence and efficiency. We are looking for highly motivated people to help us solve one of the most complex challenges of tomorrow and take our company to the next level.
