

## What's new?

---

### At the global stage for innovation

This January, for the second time in a row, we were presenting our solutions at the CES in Las Vegas. However, this year our motion planning software was showcased not only at our own booth but also at the booths of our partners [NXP](#) with [dSPACE](#) and [Kalray](#), [Green Hills Software](#) and [Ansys](#). Quite a success for us!

### Embotech as a Premium Member of the Autoware Foundation

Embotech has recently joined two initiatives in the AD space: [Autoware Foundation \(AWF\)](#) and [Project Aperol](#). In both initiatives, Embotech is contributing its Motion Planning expertise.

While Project Aperol is a pilot project supported by the German Federal Ministry of Transport and Digital Infrastructure to advance research in autonomous driving and the integration into a global mobility system, the Autoware Foundation is a non-profit organization created to enable open-source engineering collaboration projects for self-driving mobility.

## Safe Motion Planning with ThyssenKrupp

Dynamic Motion Planning at the physical limits: Autonomous obstacle avoidance and maneuvering – better than the best human driver. A breakthrough in safety for autonomous vehicles, planning at the limits of handling, as shown in Embotech's latest project with [Thyssenkrupp](#).

## Embotech's sponsorships

In the past year more than 10 student teams from all over the world have joined our Sponsorship Program, the majority being active in the Formula Student Driverless. [Artistotle University Racing](#) Team, [TUfast Racing](#) Team, [Revolve NTU](#) and [Baumann Racing](#) Team are among our newest sponsored partners.

More and more teams in the autonomous space of student formulas use our software FORCES PRO and achieve stunning results.
